Dear Parent or Guardian,

Attached are various health forms for the coming school year. It is essential for your child's health and safety to complete these thoroughly and return as soon as possible.

The New York State Education Law requires:

That "a health and dental certificate shall be furnished by each pupil in the parochial schools upon his entrance in such schools and by each child entering the ***Pre-Kindergarten, Kindergarten, Second, Fourth and Seventh*** grade thereof. An examination of any child may be required by the local school authorities at any time in their discretion to promote the educational interests of such child."

We encourage parents to have their children examined each year by their family physician and dentist. The examinations are more private and thorough and your family physician and dentist are familiar with your child's past health status and family associations. If health defects are found, corrective measures may be started immediately. To be effective, immunizations must be kept current with booster inoculations which may be administered at this time.

If for any reason you may have any questions about the above procedures, kindly contact me.

Thank you for your cooperation.

Sincerely,

Julie Slattery, R.N.
School Nurse
